

Additional Mounting Hardware for Subpanels

Available for applications requiring more support in the center of a ProLine subpanel. This is required if the enclosure will be tipped in transit or if the panel is not located at the bottom of the enclosure on the glide blocks.

FEATURES

Plated steel bracket secures to center of full-height mounting subpanel and frame or grid strap, providing additional support

Required if the enclosure will be tipped in transit or if the panel is not located at the bottom of the enclosure on the glide blocks.
