ProLine Containment System SwitchFix

Data Solutions

The SwitchFix easily solves cooling problems associated with the network switches without the need for additional energy usage. It allows your switches to benefit from cooler airflow and comply with Hot Aisle/Cold Aisle best practices.

Network switch equipment typically sits at the top and back portion of the server rack. This placement makes it difficult for cold air from the cold aisle to travel from the front of the rack to the intake side(s) of the Network Switch. The SwitchFix solves this problem by extending from the front of the rack in the cold aisle to the switch at the back of the rack. This allows cold air from the cold aisle to reach the network equipment for proper cooling.

FEATURES

- Channels cold air to the switch
- Prevents hot air recirculation
- Maintains cold aisle/hot aisle segregation
- Adjustable for a variety of depths
- Passive airflow circulation

SPECIFICATIONS

Color: Jet Black
Material: Mild Steel
Finish: Powder Coated
Color Code: RAL 9005
