

Varistar LHX+ 45 / RackChiller 45

Data Solutions

???

24630-187

The Front Blanking Kit seals the space between the floor and the Varistar CP Rack in order to minimize air leakage or recirculation. This optimizes the air path and cooling efficiency. In cold aisle containments, it is installed in the cooler's front, in hot aisle situations it is installed to the cooler's rear side.

??

Minimizes leakage of air from cold aisle to hot aisle

Fits best for Varistar LHX+ 45 In-Rack and RackChiller In-Row 45

Installs onto the levelling feet which come with the cooler
