???

### 24630-057

The hand mountable cable fingers ensure an optimal cable radius and prevent damage or breakage by ensuring an appropriate cable bend radius. The flexible T shaped structures protect the cables so that the structured cabling system remains undamaged and fully functional.

??

T-shaped cable fingers installable directly on the 19" panel mounts without screws allow for easy and clean management of copper and fiber optic cables, etc.

Each 5-Finger unit can be individually snapped on to the 19" upright based on the cable management requirements

The cable fingers protrude 81,5mm from the 19" upright, hence needs a minimum recess of ~82mm

Finger spacing of 36,45mm for high density cabling

Works only with Datacom 19" uprights / panel mounts with printed U Height identification - 24630013, 24630014 and 24630015
