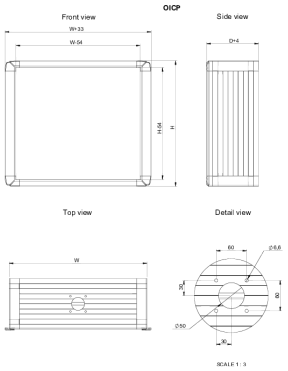
We connect and protect

Operator Interface Control Panel, OICP



The aluminium operator interface control panel, OICP, has a pre-machined hole pattern to allow for the desired fixation to a swing arm, plus a removable front plate at a IP 65 protection degree. Components can be easily fitted thanks to the removable front plate, but will also be easily accessible through a removable rear panel. Side handles on the enclosure allow for easy movement of the enclosure into the desired working position. The aluminium body will dissipate more heat than a mild steel body, which may eliminate the need for additional ventilation.
